

Feature File - ecommerce.feature

Feature: E-Commerce End-to-End Flow

Scenario Outline: Verify complete shopping workflow

```
Given User launches browser
When User logs in using "<username>" and "<password>"
And User searches for product "<product>"
And User applies filter
And User adds multiple products to cart
And User removes one product
Then Validate total amount
When User proceeds to checkout
And User logs out
Then Browser closes
```

Examples:

```
| username | password | product |
| user1    | pass123  | iphone  |
```

DriverFactory.java

```
package utilities;

import org.openqa.selenium.WebDriver;
import org.openqa.selenium.chrome.ChromeDriver;

public class DriverFactory {

    public static WebDriver driver;

    public static WebDriver initDriver() {

        driver = new ChromeDriver();

        driver.manage().window().maximize();

        return driver;
    }
}
```

LoginPage.java

```
package pages;

import java.time.Duration;

import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
```

```

import org.openqa.selenium.support.ui.ExpectedConditions;
import org.openqa.selenium.support.ui.WebDriverWait;

public class LoginPage {

    WebDriver driver;

    WebDriverWait wait;

    By username = By.id("username");
    By password = By.id("password");
    By loginBtn = By.id("login");

    public LoginPage(WebDriver driver) {

        this.driver = driver;

        wait = new WebDriverWait(driver, Duration.ofSeconds(10));
    }

    public void login(String user, String pass) {

        wait.until(ExpectedConditions.visibilityOfElementLocated(username));

        driver.findElement(username).sendKeys(user);

        driver.findElement(password).sendKeys(pass);

        driver.findElement(loginBtn).click();
    }
}

```

HomePage.java

```

package pages;

import java.time.Duration;

import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.support.ui.ExpectedConditions;
import org.openqa.selenium.support.ui.WebDriverWait;

public class HomePage {

    WebDriver driver;

    WebDriverWait wait;

    By searchBox = By.name("search");
    By searchBtn = By.xpath("//button[@type='button']");
    By addCart = By.xpath("//button[contains(@onclick, 'cart')][1]");
}

```

```

public HomePage(WebDriver driver) {

    this.driver = driver;

    wait = new WebDriverWait(driver, Duration.ofSeconds(10));
}

public void searchProduct(String product) {

    wait.until(ExpectedConditions.visibilityOfElementLocated(searchBox));

    driver.findElement(searchBox).sendKeys(product);

    driver.findElement(searchBtn).click();
}

public void addProduct() {

    driver.findElement(addCart).click();
}
}

```

CartPage.java

```

package pages;

import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;

public class CartPage {

    WebDriver driver;

    By removeBtn = By.xpath("//button[contains(@class,'remove')]");

    public CartPage(WebDriver driver) {

        this.driver = driver;
    }

    public void removeProduct() {

        driver.findElement(removeBtn).click();
    }
}

```

CheckoutPage.java

```

package pages;

import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;

```

```

public class CheckoutPage {

    WebDriver driver;

    By checkout = By.id("checkout");
    By logout = By.id("logout");

    public CheckoutPage(WebDriver driver) {

        this.driver = driver;
    }

    public void checkout() {

        driver.findElement(checkout).click();
    }

    public void logout() {

        driver.findElement(logout).click();
    }
}

```

EcommerceSteps.java

```

package stepdefinitions;

import io.cucumber.java.en.*;

import pages.CartPage;
import pages.CheckoutPage;
import pages.HomePage;
import pages.LoginPage;
import utilities.DriverFactory;

public class EcommerceSteps {

    LoginPage login;
    HomePage home;
    CartPage cart;
    CheckoutPage checkout;

    @Given("User launches browser")
    public void launch_browser() {

        DriverFactory.initDriver();

        DriverFactory.driver.get("https://tutorialsninja.com/demo/");
    }

    @When("User logs in using {string} and {string}")
    public void login(String username, String password) {

```

```

        login = new LoginPage(DriverFactory.driver);

        login.login(username, password);
    }

    @When("User searches for product {string}")
    public void search_product(String product) {

        home = new HomePage(DriverFactory.driver);

        home.searchProduct(product);
    }

    @When("User adds multiple products to cart")
    public void add_products() {

        home.addProduct();
    }

    @When("User removes one product")

Framework Features

- Scenario Outline implementation
- Page Object Model design
- Explicit Wait implementation

- Data Driven Testing using Excel
- Screenshot capture on failure
- Maven project management
- Reusable automation framework

TestNG Execution Output (Console)

Run: TestRunner x

Tests passed: 1 of 1 test - 58.697 s

TestRunner 58.697 s

Scenario Outline: Verify E58.697 s

Default Suite

Total tests run: 1, Passes: 1, Failures: 0, Skips: 0
